

RESTENA Foundation (Réseau Téléinformatique de l'Éducation Nationale et de la Recherche) operates the high speed network for education and research in Luxembourg and co-operates with international partners in the worldwide research and educational network community.

There is an immediate opening for a permanent full-time

System Engineer (m/f)

The key duties include the development and maintenance of the mail systems (email, anti-virus/spam, webmail, web-interfaces) including user support.

- Knowledge of Linux system-administration is a prerequisite, Windows system-administration is considered a plus
- Web-development skills are requested in JavaScript/CSS/HTML5
- Programming skills in Python/PHP/Perl/SQL/Java
- Background in network protocols and strong knowledge in mail systems (IMAP, SMTP ...)
- Fluency in speech and writing in English is required, as well as a good command of Luxembourgish, French and/or German.

Applications are invited from university graduates with excellent academic track record in computer science. We expect perseverance, creativity and communication skills to strengthen our team on the new university campus in Esch/Belval.

Applications including a motivation letter and curriculum vitae with the copies of relevant certificates should be sent to:

Fondation RESTENA

Direction

6, rue Coudenhove-Kalergi
